DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6, “, said bottom flaps,” is unclear within the context of the claim, i.e. “said bottom flaps” what?

In claim 4, line 4, “perforations” is a double inclusion of elements insofar as the perforations along the crease line of the rear top flap were previously defined in claim 1, i.e. the rear top flap perforations are being reintroduced into the claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kanter (fig. 5 emb).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanter (fig. 5 emb) in view of either Heathcock or Nishiguchi et al. Kanter discloses all structure of the claimed box except a tear out segment disposed in the rear side. Each of Heathcock and Nishiguchi et al teaches that it is known to provide tear out segments in opposing walls of a box (see col. 6, lines 12-31 in Heathcock; elements 2a, 2b in Nishiguchi et al) to allow removal from either the front or rear. It would have been obvious to provide a tear out segment in the rear side of the box in Kanter as taught by either Heathcock or Nishiguchi et al to allow removal of the top from either side of the carton.

Allowable Subject Matter

6. Claims 3 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
